JALENSO
HOLDINGS

COMPANY PROFILE

2025 - 2026

HI THERE!

Jalenso Holdings is poised to shape the future of engineering and construction across South Africa. Entering 2025 and 2026, our ambition is to lead the industry through innovation, sustainability and community empowerment. We are expanding our capabilities across civil works, structural engineering, electrical installation and mechanical fabrication. By investing in digital technologies, advanced materials and skilled people, we deliver world-class solutions. Together with our partners, we build resilient infrastructure that supports economic growth and improves lives.

JALENSO
HOLDINGS

WELCOME
MESSAGE

Welcome to Jalenso Holdings, a distinguished South African civil and structural engineering firm committed to delivering comprehensive, end-to-end solutions across the mining, petrochemical, energy and municipal sectors. As the Managing Director and Chairman of the Board for Jalenso Holdings, I am honoured to introduce you to an organisation that prides itself on engineering excellence, innovation and unwavering adherence to the South African National Standards (SANS). Founded in 2023, Jalenso Holdings combines a robust heritage of civil engineering expertise with cutting-edge technologies and a strong focus on quality, safety and sustainability. Our multidisciplinary team comprises seasoned engineers, project managers and skilled artisans who work tirelessly to design, fabricate, construct and maintain infrastructure projects that exceed client expectations.

At Jalenso Holdings, we understand that infrastructure is the backbone of economic growth and social development. We therefore approach each project with a commitment to integrity, transparency and community upliftment. Our services span civil works, including earthworks, concrete foundations and structural steel installations, electrical and mechanical installations, corrosion protection, rubber lining, scaffolding, and consulting. We are deeply invested in sustainable development, incorporating green building practices, energy-efficient designs and responsible resource management to minimise environmental impact while enhancing project value. In partnership with our clients, we prioritise local procurement, skills development and community empowerment, ensuring that our work leaves a positive legacy long after project completion.

ABOUT **COMPANY**

EXECUTIVE OVERVIEW

Jalenso Holdings stands at the forefront of South Africa's evolving engineering and construction landscape. Founded in 2023, our firm offers integrated civil, structural, electrical, mechanical and industrial services. We partner with clients in the mining, petrochemical, energy and municipal sectors to design, build, maintain and upgrade critical infrastructure. Looking ahead to 2025–2026, we aim to lead the industry through innovation, sustainability and community empowerment. Our multi-disciplinary expertise, adherence to South African National Standards (SANS) and commitment to quality position us to deliver resilient infrastructure that supports economic growth and improves lives.

HISTORY & GROWTH

Jalenso Holdings began as a specialized inspection and consulting firm focusing on civil and structural projects. Over the past two years, we expanded to include end-to-end project delivery, from design and fabrication to construction, inspections, corrosion protection and maintenance. Our client portfolio now includes major players such as Evander Gold Mine, Sasol, Eskom and Air Liquide. The company's early success is rooted in its unwavering focus on quality, integrity and safety, which remain the cornerstones of our growth strategy.

JALENSO HOLDINGS

WHY US

INNOVATION AT THE CORE

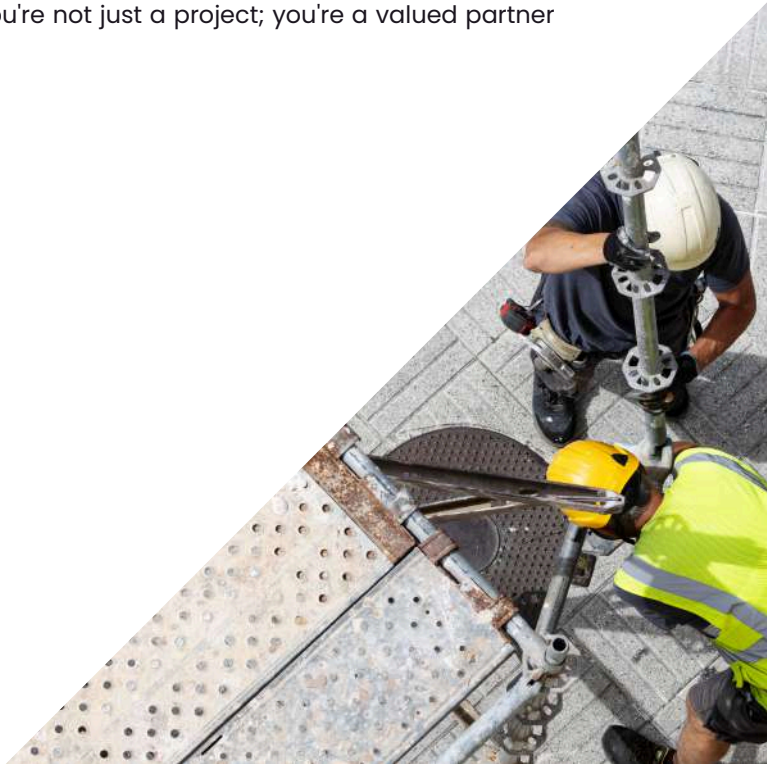
Jalenso Holdings is not just a construction and consulting firm; it's an innovation hub. Our commitment to merging proven construction practices with the latest technology sets us apart. When you choose Jalenso Holdings, you're selecting a partner dedicated to pushing boundaries and delivering projects that redefine industry standards.

COLLABORATION FOR SUCCESS

Jalenso Holdings believes in the power of collaboration. We don't just build structures; we build lasting relationships. Our team works closely with clients, architects, and stakeholders, ensuring a harmonious blend of ideas. This collaborative spirit is the driving force behind successful projects, where diverse perspectives converge to create spaces that reflect purpose and vision.

CLIENT-CENTRIC APPROACH

What sets us apart is our unwavering commitment to our clients. We believe in open communication, transparency, and a collaborative approach throughout the entire project lifecycle. Your vision is our priority, and we go the extra mile to ensure that your expectations are not just met but exceeded. Our client-centric philosophy means you're not just a project; you're a valued partner in the creation of something exceptional.



OUR
VISION & MISSION

VISION

Our vision is to build resilient infrastructure that meets current needs while anticipating the impacts of climate change and technological evolution. We aspire to lead the development of adaptive civil and structural solutions that evolve with environmental, economic and social conditions. We aim to catalyse community transformation by delivering projects that uplift local economies and create meaningful employment opportunities. Sustainability is central to our vision, embracing energy-efficient designs and responsible resource management to minimise environmental impact. We seek to set the benchmark for engineering excellence in South Africa, balancing innovation with social responsibility to enhance quality of life. Ultimately, we envision leaving a legacy of infrastructure that serves present and future generations, fostering inclusive growth and prosperity.

MISSION

Our mission is to deliver integrated engineering solutions across civil, structural, electrical and mechanical disciplines with uncompromising quality and safety. We are committed to environmental stewardship, incorporating sustainable practices and materials to maximise long-term value for clients and communities. We dedicate ourselves to empowering local communities through skills development, inclusive employment and support for small suppliers. Our mission includes fostering partnerships that promote innovation, collaboration and continuous improvement across every project. We strive to maintain a zero-harm culture by prioritising the health and safety of our workforce and stakeholders. Ultimately, we aim to be the preferred partner for clients seeking sustainable, community-centric solutions that contribute to South Africa's socio-economic development.

OUR SERVICES

CIVIL WORKS (DESIGN, BUILD & MAINTAIN)

Comprehensive earthworks, concrete foundations, slabs, bund walls, platforms, roads and drainage systems, executed in accordance with SANS 2001 and SANS 10100 standards. This service includes detailed design, construction and maintenance of industrial and mining civils.

ELECTRICAL WORKS & CABLE RACK SYSTEMS

Installation of low-voltage distribution boards, cable ladders, trays and trunking, earthing networks and instrumentation in compliance with SANS 10142-1 and IEC 61537. This service encompasses cable routing, segregation, thermal management and commissioning, ensuring safe and reliable electrical infrastructure.

RUBBER LINING & CORROSION PROTECTION

Surface preparation to SA 2.5 standards (ISO 8501-1), followed by application of rubber linings (natural, hard rubber, bromobutyl) for tanks, chutes and pipelines, and protective coatings per ISO/SANS 12944 for harsh environments. This protects assets from acids, alkalis, brines, slurry and environmental degradation.

STRUCTURAL STEEL FABRICATION & WELDING

Design, fabrication and assembly of structural steelwork, handrails, gratings, platforms and modular skids, adhering to AWS D1.1 and SANS 10162-1. Services include shop detailing, welding, trial assembly, galvanizing (SANS 121) and on-site erection, delivering robust and compliant steel structures.

OUR
PROJECT PORTFOLIO

ELIKHULU PREGNANT SOLUTION AND OVERFLOW TANKS

Jalenso refurbished and lined the pregnant-solution tanks and overflow piping at Elikhulu. The project involved internal scaffolding, blasting to achieve a near-white metal finish and installation of bromobutyl rubber linings resistant to cyanide-rich solutions. Welds and seams were carefully sealed, and spark testing ensured a continuous lining. External surfaces received a three-coat epoxy system to comply with corrosivity category C5 coatings.

ESKOM – COOLING TOWERS PLANNED MAINTENANCE

For Eskom, Jalenso provided safe access and maintenance for cooling towers at a power station. We designed and erected modular scaffolding systems compliant with SANS 10085-1, enabling inspection of tower internals and drift eliminators. The scope included dismantling and reinstallation of fill pack components, concrete repairs to tower shells and application of protective coatings. All work was scheduled during a short outage to minimise impact on power generation.

SASOL – NEW PIPELINE UNIT RUBBER LINING

Sasol engaged Jalenso to protect a new pipeline unit carrying aggressive chemicals. Our team performed surface preparation, selected appropriate lining materials and installed chemical-resistant rubber linings inside pipelines, elbows and fittings. Adhesion promoters and tie-coats were applied to ensure a robust bond, and spark testing was conducted to detect pinholes. The project extended the life of the pipeline system and reduced the risk of leaks and contamination.

OUR
PROJECT PORTFOLIO

ELIKHULU CIL TANK RUBBER LINING

Jalenso performed a complete refurbishment of a carbon-in-leach (CIL) tank at Elikhulu. The scope included abrasive blasting to SA 2.5 to remove old coatings, soluble-salt testing, and profile checks. After surface preparation, we applied a multi-layer natural rubber lining designed to withstand cyanide-rich slurry, using specialised adhesives and vulcanisation. Final quality assurance involved spark testing, adhesion pull-off tests and thickness mapping to verify integrity and longevity.

ELIKHULU SLURRY PIPELINES & LAUNDERS

This project focused on protecting Elikhulu's slurry transport system. We dismantled existing pipelines and launders, prepared the internal surfaces with grit blasting and solvent cleaning and installed abrasion-resistant rubber linings with dovetail joints at flange areas to prevent delamination. The work covered over 1 km of pipework and multiple launders feeding to thickeners. Holiday testing and hydrostatic pressure tests ensured there were no defects or leaks before recommissioning.

ELIKHULU THICKENER UNDERFLOW SUMPS & PUMP HOUSINGS

In this scope, Jalenso applied hard-rubber linings to the underflow sumps, feed wells and pump casings associated with Elikhulu's thickeners. We performed high-pressure water jetting to remove scale and corrosion, followed by grit blasting and priming. Linings were custom-fitted to complex geometries and cured on site using temperature-controlled methods. The use of elastomeric linings has significantly increased equipment life in high-abrasion zones and reduced maintenance downtime.

OUR
PROJECT PORTFOLIO

AIR LIQUIDE – ANTENNA STRUCTURAL FRAME DESIGN

Jalenso designed and fabricated a new steel frame to support antennas at an Air Liquide facility. The scope involved structural analysis, detailed design in accordance with SANS 10162-1, fabrication of steel sections and on-site installation. Galvanising (SANS 121) and a three-coat paint system were applied for corrosion protection. The project delivered a stable and long-lasting structure for critical communication equipment.

GOVAN MBEKI MUNICIPALITY – WATER INFRASTRUCTURE REHABILITATION

Working with the Govan Mbeki Municipality, Jalenso rehabilitated aging water reservoirs and pipeline infrastructure to support local service delivery. The scope included structural inspections, concrete repairs, replacement of corroded reinforcing steel and installation of new liners. In parallel, pipelines were upgraded with corrosion-resistant coatings and leak detection systems. These upgrades align with South Africa's push for public-private partnerships and infrastructure development, ensuring reliable water supply for the municipality.

EVANDER GOLD MINE – LOWERED CIL TANK STRUCTURE

At Evander, Jalenso performed a structural and corrosion-protection upgrade to a lowered carbon-in-leach tank. Tasks included structural assessment, surface preparation and coating application. The team evaluated the integrity of the tank shell and support beams, removed degraded coatings, repaired corrosion damage and applied a high-build epoxy system. This upgrade increased the tank's service life and ensured compliance with plant safety standards.

OUR VALUES

INTEGRITY

At Jalenso Holdings, integrity is the foundation of everything we do. We maintain the highest ethical standards and are committed to transparency and honesty in all interactions with clients, partners, employees and communities. Our decisions and actions are guided by a strong moral compass, ensuring that every project is delivered with honesty and accountability. We believe that trust is earned through consistent, ethical conduct, and we work diligently to uphold this trust in every engagement.

Innovation

We embrace a culture of continuous innovation, pushing the boundaries of traditional engineering and construction practices. Jalenso Holdings remains committed to adopting the latest technologies, sustainable materials and creative methodologies to improve project outcomes. By fostering an environment where new ideas thrive, we encourage our teams to explore cutting-edge solutions that drive efficiency, reduce environmental impact and enhance community benefits. Our dedication to innovation ensures that we remain at the forefront of industry advancements, setting benchmarks in quality and performance.

Safety Excellence

The well-being of our employees, clients and the public is paramount. Jalenso Holdings is dedicated to maintaining the highest standards of safety across all our operations, adhering to South African National Standards and international best practices. We implement rigorous safety training programmes, continuously update our safety protocols and invest in advanced protective measures to mitigate risks. Our proactive approach to health and safety ensures that every project is executed with utmost care, reinforcing our commitment to zero harm and fostering a culture where safety is everyone's responsibility.

Sustainability & Social Responsibility

We recognise that our success is intertwined with the health of our environment and the prosperity of the communities in which we operate. Jalenso Holdings is committed to sustainable practices that minimise environmental impact, including the use of eco-friendly materials, energy-efficient designs and waste reduction strategies. We prioritise social responsibility by supporting local economies, investing in skills development and ensuring that our projects contribute positively to society. By integrating environmental stewardship and community upliftment into our operations, we strive to create enduring value that benefits both current and future generations.
